

TuneBlade Command Line Options

Option	Description
Silent	Start without the splash icon and without showing the UI after init.
Isolate	TuneBlade will not save any settings. TuneBlade will start and load with the currently saved settings, but it will not modify any settings. Any changes made to the settings will effect the behaviour of TuneBlade as desired, but the settings will not be persistent between application restarts. Multiple isolated instances of TuneBlade can run simultaneously.
StartHttpControl	TuneBlade will start the HTTP control server. (The setting will remain persistent between application restarts)
StopHttpControl	TuneBlade will not start the HTTP control server.
Port=<port-num or auto>	The Port number to be used for the HTTP control server.
RemotePW=	Specify password for Remote HTTP interface and enable password. a-z A-Z 0-9
StopRemoteZeroConf	Don't broadcast remote service availability.

Usage Example:

TuneBlade.exe Silent Isolate StartHttpControl
